1.0 About Us

Dhariz Beach Park, Salalah, Oman

We are professional landscape consultants, with staff that have served Oman for over 9 years. As landscape architects, we design outdoor spaces focusing on functionality, aesthetics and sustainability. We design to the context of each space and amplify the usefulness and meaning of each landscape. We create landscapes that draw people outdoors to interact with their surroundings and with other people. Outdoor recreation and socializing are important activities in a healthy lifestyle. We believe that a well-designed landscape increases our appreciation for the outdoors and improves our wellbeing.

We design landscapes at all scales, from large scale master plans to intricate detailed design projects. Our design and planning projects include: Regional and City Projects, Nature Parks, Urban Parks, Mixed-use Complexes, Campuses, Waterfront Developments and Residential Projects. We offer full landscape architectural services, including concept design, detail design, tender services and construction supervision.

We design all things outdoors, softscape and hardscape, including garden structures, walls, furnishings, pools, waterfeatures, planting designs and irrigation designs. With our affiliates we also design buildings to compliment and service the landscape.

2.0 Our Vision

STF Campus, Al Khoud

STF Campus, Al Khoud

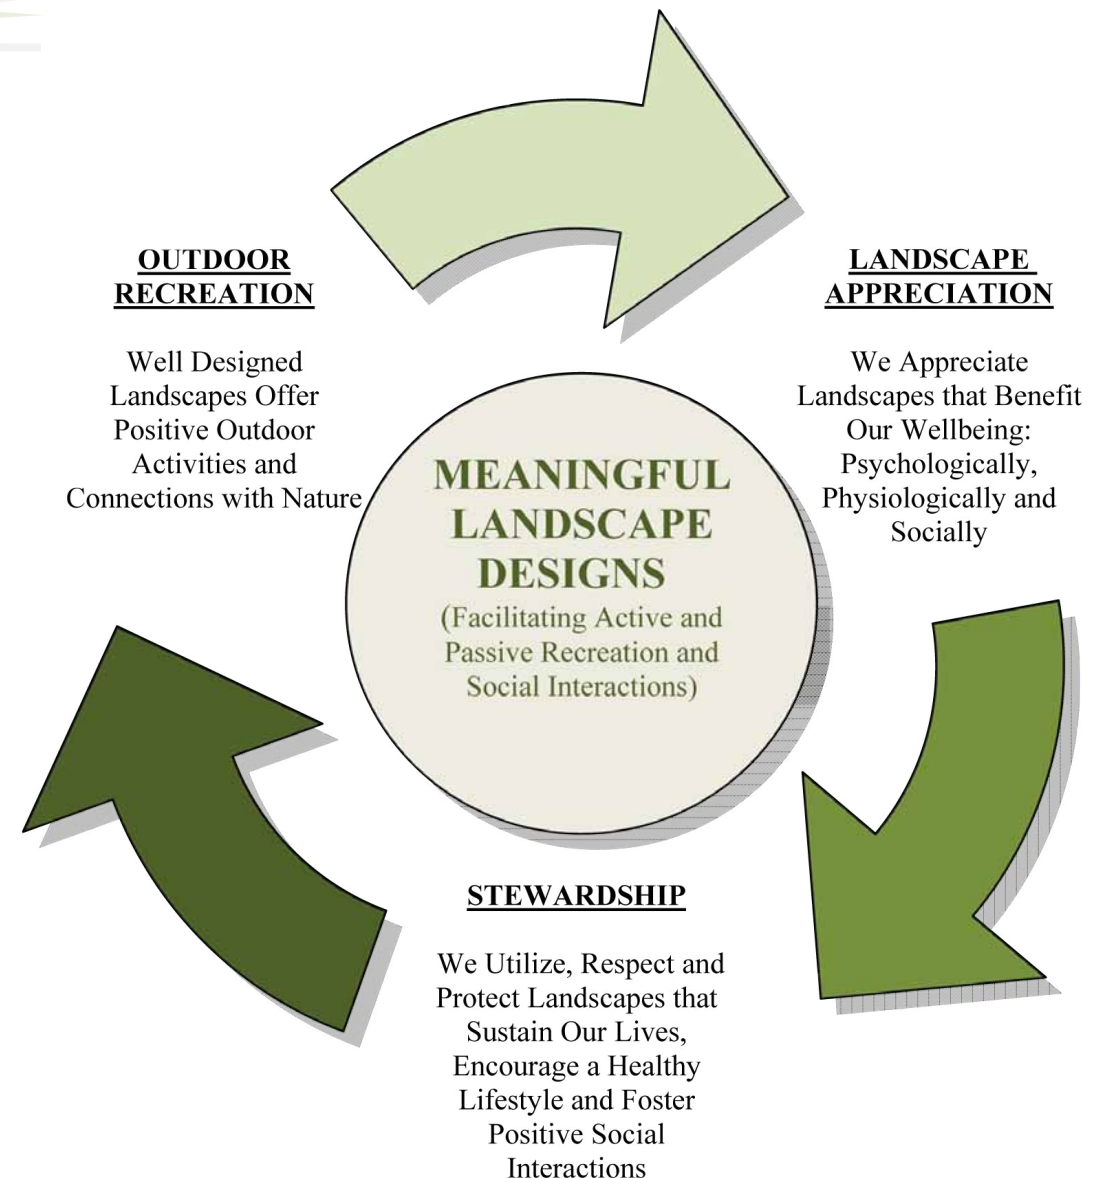

Our Vision is to serve our customers with creative and meaningful designs with cost effective and sustainable solutions.

3.0 Our Mission

Our Mission is to raise landscape standards by designing landscapes that people appreciate and enjoy. We believe the key to landscape sustainability is appreciation. Landscapes that increase the enjoyment and wellbeing of society will foster better stewards of urban spaces, nature and the environment. Therefore, we always set out to create meaningful landscapes that benefit our clients and society.

4.0 Projects

Bank Concept Proposal

We have designed and supervised two major city park projects for the Ministry of Tourism and Dhofar Municipality in Salalah: Dhariz Beach Park and Mazaibi Restaurant Park. Both projects opened in June 2015. The projects are valued over RO 5.0 million.

We have master planned the new campus for A'Sharqiyah University, arranging roads, buildings and open space with two natural wadis running through the site. The project is under construction.

We have completed two large government master planned projects. In both sites we designed all common areas, recreation areas, landscapes around buildings and the streetscapes. Because of the nature of these projects we cannot share project names and images.

In May 2015, we completed designing a 700,000 square meter campus for the Royal Omani Police Security Task Force in Al Khoud. This security campus is equipped with a training center/ academy, administration buildings, housing facilities, retail center, several recreation facilities, penitentiary, mosques, etc. We have laid out the roads and designed the streetscapes, open spaces recreation areas, recreation paths and designed the landscapes for each building.

This year we have teamed up with Artelia to masterplan the North Batinah Region. This large and prestigious project will provide the Ministry of Housing guidance for growth in this rapidly developing region.

We are also designing and supervising private villa projects.

5.0 Conclusion

We are dedicated to our clients, passionate about great design and it's our strongest desire to produce exciting, meaningful and sustainable landscapes.

With each project comes a unique set of opportunities and challenges. We will serve you by providing our best service every step along the way. With an exciting concept we will give your project the creative spark it needs to move forward. With our talented staff we will produce the drawings and provide construction supervision to ensure your project is realized.

We look forward to serving you on your upcoming projects!
