## CONVENTIONAL / STRUCTURALLY GLAZED CURTAIN WALL

Curtain Wall is the central unit in the planning and design of building envelopes. We offers a variety of systems, which allow even the most innovative curtain wall concepts to be realized supremely well architecturally: from window curtain wall with a perfect appearance to impressive structural glazing curtain wall.

The extensive range of profile systems from NAPCO ALUMINUM Systems and GULF EXTRUSION Glazing Systems allows the conceptual design of a wide variety of Curtain Wall. The variety of options within the systems offers architects and developers considerable scope for creativity. And custom solutions, based on proven systems such as ALNOOR, QALX can of course also be implemented.

### Key benefits:

- Complete profile systems in aluminium and steel
- All Curtain wall types, including twin Curtain wall
- Window units in all opening types
- Passive and active solar shading systems
- Innovative Curtain wall management technology
- State-of-the-art protection against fire and smoke
- Curtain wall constructions in all resistance classes

## ALUMINUM SCREENS & PARTITIONS

Using glazed partitions creates a modern, spacious office design that maximises on natural light. Window blinds can be installed to create privacy when required. WINDAR supply and install glass office partitions, in both clear and frosted glass. We use a frameless, full glazed, dry jointed partitioning system with translucent channels between the modules. This gives a seamless aspect and an ease of relocatability. Single or double glazing is available using 6mm to 12mm glass with the option of integral window blinds within the double glazed modules.

We offer a range of doors to work with glazed partitions including hinged or sliding glazed doors with channels at the head and base. Our organization has received appreciation for offering various kinds of partitions in compliance with latest market trends. These Partitions includes Aluminium Partition, Frameless Glass Partition, Paneling & Partitions and others. The designing process is carried out under optimum control measures to meet the specification of clients.

### Glazed Partitioning - Features

- There is the option of using channels at the head and base.
- Glazed partitioning creates a look of clean lines created by the translucent, rigid channels between the modules which are uninterrupted by intermediate posts.

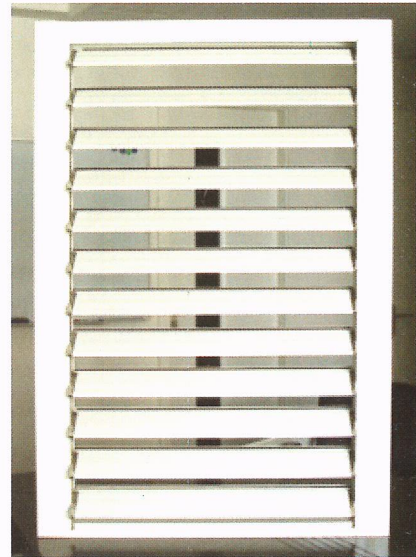

### Applications

Shopfronts, restaurants, airport, shopping areas, hotel lobbies, showrooms and offices

## LOUVER AND SANDWICH PANEL DOORS AND WINDOWS

Aluminum composite panel cladding panels are the most commonly preferred external cladding material by the architects. It reduces the self-weight of the building. We offer a variety of facades using various types of external cladding material with variety of metallic & natural stone finishes with appropriate thermal insulation precautions. We have a wide range of finishes from ALUCOBOND(USA)

## ARCHITECTURAL METAL CLADDING

Aluminum composite panel cladding panels are the most commonly preferred external cladding material by the architects. It reduces the self-weight of the building. We offer a variety of facades using various types of external cladding material with variety of metallic & natural stone finishes with appropriate thermal insulation precautions. We have a wide range of finishes from Qatar ALUCOBOND (USA).

## SLIDING & CASEMENT WINDOWS

Windows characterize the appearance and form of projects perhaps more than any other component. Hence, WINDAR aluminium windows range from standard windows to designer windows, and special windows with diagonal contours and fine mouldings in keeping with the original style. A special feature of the material is that aluminium can be shaped with precision, thus enabling your wishes and requirements of the window to be individually fulfilled.

### Highlights :

- Innovative technology.
- System-tested security.
- Wide range of units and opening types.
- Rich variety of colors.
- Large range of fittings, glazing beads and handles offers scope for creativity.
- Efficient thermal and sound insulation.
- Easy maintenance.

## SLIDING & CASEMENT DOORS

Doors are a prominent feature in the building envelope and give each building its own individual character. Doors are impressive on account of their versatility: as transparent transitions or discreet room dividers, they add emphasis in indoor areas - or they create generous gateways to the outside. Features, design and technology are at the highest level. Aluminium doors open up numerous new possibilities for the attractive design of the outside of the building envelope: because aluminium is easy to form and shape, individual ideas and requirements can also be met. The system provides the optimum combination of design and function

### Highlights :

- Considerable scope for creativity and individuality.
- Wide choice of colors.
- System-tested quality, Large areas of glass.
- Wide range of shapes and designs.
- Aesthetic design.
- Large areas of glass, High insulation and security technology
- Separate series for internal and external use.
- Profiles in a range of basic depths and face widths.
